Force360 recognise that without product certification by a Notified Body all product performance testing, and adherence to standards claims cannot be independently verified. If they are not as claimed, serious safety implications for the wearer, and legal implications for the supplier and even the employer may arise. Force360 source their entire range of Mechanics hand protection from a single manufacturing partner to ensure consistency and reliability of product, but most importantly Force360 have taken the further step of engaging a globally recognised Notified Body to audit and certify both the manufacturing process and the products. All of Force360's hand protection is certified to the latest AS/NZS hand protection standards.

Key Technologies

360° Breathability

Keeping hands cool is critical for comfort and improved wearer compliance. Only selected materials that allow air flow are used to ensure 360 degree air circulation and enhanced breathability.

4 Way Spandex

Force360 only uses 4 Way Spandex in its glove construction allowing complete hand movement and flexibility.

Reinforced Wear Points

Force360 gloves last longer due to a double layer fabric coupled with double stitching reinforcement in high wear areas.
