

**CWRX706/707**

# Laboratory Coat

28GSM SPP

## Features

- ▲ 28gsm lightweight Spunbonded Polypropylene (SPP) non-woven material
- ▲ Protection from non hazardous dry particle and water based liquid sprays and splashes
- ▲ Elasticated wrists
- ▲ Velcro front closure
- ▲ Single collar design
- ▲ Suitable for food and medical use

## Specifications

**Part No.** CWRX706  
CWRX707

**Material** SPP

## Sizing

**Available Sizes**  
XL, 3XL

## Packaging

50

## Available Colours

CWRX706 White  CWRX707 Blue

## Material Guide

**SPP**

Spunbond Meltblown Spunbond (SMS) is a unique trilaminate construction, that offers good tensile strength and barrier protection. Usually more breathable than Microporous and often selected to keep wearers cooler whilst working in high heat areas. The softer feel of SMS makes it a comfortable choice. SMS can be anti-static, fire retardant treated, or liquid proofed that allows for a variable range of applications.
