

CWRX709/710

Disposable Apron

20µm LDPE

Features

- ▲ 20µm lightweight Low-Density Polyethylene (LDPE) impervious material
- ▲ Impervious protection from non hazardous dry particle and water based liquid sprays and splashes
- ▲ Ties at the back of the waist and around the neck
- ▲ Generous body coverage 80 x 125cm

Specifications

Part No. CWRX709
CWRX710

Material LDPE

Sizing

Available Sizes
One size fits all

Packaging

1000

Available Colours

- CWRX709 White CWRX710 Blue

Material Guide

LDPE

Low Density Polyethylene (LDPE) is the low density version of PE. Similar to PE, LDPE has excellent resistance to water, moisture and most organic solvents and chemicals. LDPE has high ductility but low tensile strength, which is evident by its propensity to stretch. LDPE is highly flexible and perfect for protective garments which have a short term requirement.
